How do I insert a reference only in the bibliography of a document?

This is used when you want to refer to a work in a narrative format and not use an in-text citation. An example would be:

“Therefore, an important question to answer is whether close follow-up as suggested by Cordeiro in 2015 helps to establish or refute a relationship between aneurysmal behavior and growth. We therefore aimed ...”

Insert the reference in your document at the required location and then follow the steps below to suppress its appearance in the document but maintain it in the bibliography.

1. Right click on the in-text citation
2. Select Edit Citation(s)
3. Select Show Only in Bibliography
